## PROFESSIONAL SUMMARY

Certified Data Engineer (**Snowflake SnowPro Core, AWS Solutions Architect, Databricks Data Engineer**) with 2+ years of experience engineering data extraction pipelines and analytical datamarts in the **BFSI / Banking** domain. Proven expertise at **Tata Consultancy Services (Client: State Bank of India)** processing and manipulating **4.45M+ daily transaction records** across 12-hour settlement cycles using **SQL, Python, PySpark, Apache Airflow, and Oracle DB**. Skilled in database query optimization, automated data quality assertions, and reconciliation frameworks with 99.8% SLA reliability.

## CERTIFICATIONS

- Snowflake SnowPro Core Certification** — *Snowflake Inc.* (Issued: Jul 2026)  
ID: S159845-260728-COF
- AWS Certified Solutions Architect – Associate** — *Amazon Web Services (AWS)* (Issued: Jun 2026)  
ID: fd461ec57a104b2381260114d1a42bf1
- Databricks Certified Data Engineer Associate** — *Databricks* (Issued: Sep 2026)  
ID: 193994560

## TECHNICAL SKILLS

**Databases & Querying:** Oracle Database (Complex Queries, Joins, CTEs, Window Functions, PL/SQL, Performance Tuning)  
**Languages & Scripting:** SQL (Advanced Transformations), Python (ETL Scripting, Data Structures), Bash / Shell Scripting  
**Data Quality & Governance:** Pre/Post-load Financial Reconciliation, Data Validation Checks, Schema Consistency, Audit Compliance  
**Cloud & Warehouses:** Snowflake (Virtual Warehouses, Data Modeling, SnowSQL), AWS (AWS S3, Cloud Fundamentals), Databricks  
**Data Modeling & Design:** Dimensional Modeling (Kimball Star Schema, Snowflake Schema), Fact & Dimension Tables, SCD Type 1 & 2  
**Big Data & Processing:** Apache Spark (PySpark, Spark SQL), Broadcast Joins, Partitioning, Shuffle Optimization, OOM Debugging  
**Workflow Orchestration:** Apache Airflow (DAG Design, Scheduling, Task Dependencies, Failure Alerting, SLA Monitoring)  
**Tools & Operating Systems:** Linux

## WORK EXPERIENCE

**Data Engineer** — *Tata Consultancy Services (Client: State Bank of India)* **Apr 2024 – Present**  
**Project: Vendors Payment & Settlement System (VPS)** *Mumbai, India*

- Database & Query Optimization:** Refactored complex SQL transformations, indexing, and batch loading procedures in Oracle DB, slashing batch execution runtimes by 20% and improving reporting throughput.
- High-Throughput Batch Ingestion:** Architected and maintained end-to-end batch ETL pipelines ingesting 4.45M+ transaction hits across 12-hour daily settlement cycles from core banking Oracle staging environments into analytics datamarts.
- Financial Ledger Reconciliation:** Engineered automated pre-load and post-load reconciliation scripts in SQL and PySpark to cross-verify debit/credit ledger balances and transaction counts, driving a 25% improvement in data accuracy for audit compliance.
- Airflow Orchestration & SLA Adherence:** Scheduled and monitored 20+ production Apache Airflow DAGs, implementing robust task dependencies and automated alerting mechanisms that sustained a 99.8% workflow success rate.
- Spark Performance Tuning & RCA:** Diagnosed and eliminated recurring PySpark Out-of-Memory (OOM) exceptions and data skew by implementing broadcast joins, optimal repartitioning, and shuffle partition tuning, cutting pipeline downtime by 30%.

## TECHNICAL PROJECTS

### Automated REST API Batch Ingestion & Dimensional Warehouse Pipeline

*Technologies: Python, PySpark, Snowflake, AWS S3, SQL, Dimensional Modeling (Star Schema)*

- Built a modular batch ingestion framework in Python fetching semi-structured JSON payloads from multi-endpoint REST APIs with automated pagination, token handling, and robust retry mechanisms.
- Implemented automated data quality assertions verifying row counts, primary key uniqueness, and null constraints across analytical datasets.
- Designed and deployed a Kimball Star Schema data warehouse in Snowflake, structuring normalized dimension tables (SCD Type 1) and transactional fact tables for business intelligence queries.
- Executed scalable distributed transformations using PySpark to clean, flatten nested JSON schemas, and enforce schema validation rules prior to staging on AWS S3.

## EDUCATION

**Master of Computer Applications (MCA)** **2025 – 2027 (Pursuing)**

G. H. Raisoni College of Engineering and Management (KBC NMU), Jalgaon

**Bachelor of Computer Applications (BCA)** **2020 – 2023**

R. C. Patel Arts, Commerce and Science College (KBC NMU), Shirpur | CGPA: 9.62 / 10.0
